Dermacool

FRONTLINE

menthol in aqueous cream
for the skin

when it's important to keep cool!

Naturally cooling menthol alleviates many skin conditions, such as sunburn, dermatitis and eczema. Dermacool contains soothing menthol to cool and care for irritated skin. Its non-greasy formula locks in moisture to hydrate areas of discomfort in all environments.

The calming menthol in Dermacool can combat the itch-scratch cycle. With less than 1% sodium lauryl sulphate, Dermacool is among the gentlest menthol aqueous creams on the market.

Plus, its pump action dispenser minimises cross contamination and cuts waste.
